Zoe Davidson Jewellery takes inspiration from Orkney's seas, coastlines, and rich history. She combines traditional silversmithing techniques with more unusual methods like fold-forming and anti-clastic raising to create her designs.

After graduating in Jewellery & Metal Design from Dundee's Duncan of Jordanstone College of Art & Design in 2013, Zoë interned with Iris Van Herpen in Amsterdam and jeweller Gilly Langton in Plockton before working with two Orkney-based jewellery companies. She launched her own business in 2016, and in 2019, she earned several accolades, including a Bronze award at Scotland's Trade Fair and a nomination for the '30 Under 30 Rising Star Awards' in Retail Jeweller.

Beyond her signature collections, Zoë specialises in bespoke jewellery, including remodelling cherished pieces, creating bold statement designs, and crafting engagement and wedding rings tailored to individual stories.

Michael is an Orcadian who has been practicing the craft of woodturning for over 30 years, he is self-taught and has honed his skills using a combination of practice, experimentation and the desire to produce fine attractive pieces.

He was accepted onto the Register of Professional Turners (RPT) in 2017.

He specialises in unique one off pieces of woodturning. These pieces are heavily influenced by the Neolithic artifacts found here in the islands. He is now exploring iron age and Viking treasures which are also influencing his work, along with some nautical themes reflecting his past career at sea.

Hardwood logs are processed on site utilising a chainsaw and our own small sawmill. This gives Michael the greatest flexibility to cut the best blank for the piece he has in mind.

A mixture of modern, traditional and hand techniques are used to achieve the desired effect in the finished piece.

All this results in Michael creating unique pieces to enhance any setting.

Orkney inspired oil paintings and wildlife sculptures.

David's oil paintings reflect the landscape of Orkney, its intense and ever-changing light and weather.

Many of the paintings feature the traditional buildings which over generations have become an integral part of the natural landscape.

The wood sculptures re-create the birds and animals of Orkney and elsewhere, seeking to give permanence to the fleeting images of wildlife. Standing approximately life-size, these are individually sculpted and each one is unique.

**Directions:** From Finstown take the Evie road, pass the Tingwall turnoff then continue down the hill and take the next right, the Woodwick Road. We are on your left opposite the red postbox. We're also on bus route number 6 from Kirkwall. Ask for Woodwick Stores.

## Orkney chairs have been at the heart of island homes for centuries

Traditionally made from driftwood found on the shoreline, their distinctive oat straw backs, often hooded, offered shelter from the draughts in old stone croft houses.

Scapa Crafts have been hand-making premium quality Orkney chairs for over thirty years, carrying on this Orcadian tradition, with pride, passion and attention to detail.

The majority of our bases and frames are now made using only the highest quality hardwoods, including oak, walnut and sapele.

We offer three different sizes of chair – gent's, lady's and child's – with the option of a hood and/or a drawer. You can also choose from a solid wood or woven seagrass seat.

**We look forward to welcoming you to our Kirkwall workshop to view our range of Orkney chairs and see the ancient technique of hand-stitching the straw backs in progress.**

**Directions:** From Kirkwall town centre, follow signs for Balfour Hospital. Turn right into Scapa Court just before the zebra crossing to the hospital. The workshop is on the left about 40m from the junction. Follow our signs!

Celebrating 20 years in business,  
Orkney Hand Crafted Furniture was  
launched in 2004 by Fraser Anderson.  
The business was born out of his love  
of working with wood and the look, feel  
and design of a classic Orkney chair.

**Directions:** from Kirkwall Pier, head south along Junction Road towards Highland Park Distillery and Scapa beach, then take the left road, signposted Scapa Crescent, before the zebra crossing at the new Balfour Hospital. The workshop is well signposted across the garden path.

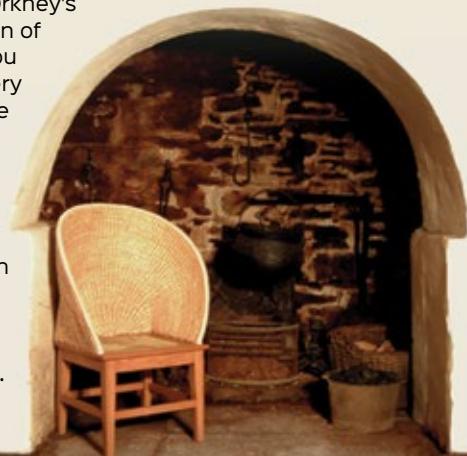

**[www.orkneyhandcraftedfurniture.co.uk](http://www.orkneyhandcraftedfurniture.co.uk)**

Fraser creates traditional and  
bespoke Orcadian furniture  
- from chairs and stools, to  
tables, mirrors and everything  
in between – at his workshop in  
Kirkwall. Everything is built by  
hand, using techniques and  
tools derived from  
generations of furniture  
makers in the islands.

Driftwood collected from the  
Orkney shoreline is often  
used to make unique pieces  
of furniture – indeed, you'll  
regularly see huge cuts  
of wood salvaged from  
the sea drying outside  
Fraser's workshop.

Come and visit to see Fraser and  
his family help keep Orkney's  
long-standing tradition of  
craftsmanship alive. You  
can also visit his gallery  
to see his latest range  
of items.

Orkney Glass Hut Studio and Gallery overlooks historic Scapa Flow with uninterrupted views of the Island of Hoy.

Orkney Glass Hut is a small family-run business specialising in fused glass art, with Liz as the driving and artistic force. Originally from NE England, Liz relocated to Burray in 2012 having fallen in love with the islands on holiday. Her professional career spans 25 years teaching in primary and secondary schools as well as Special Educational Needs but her passion for and involvement in art goes back well before this. The 'pull' into her artistic journey was inevitable, and now, this has culminated into two distinct passions: Fused Glass and Naïve Art.

All the original art created at Orkney Glass Hut is unique, hand-made and inspired by the flora, fauna, scenery, weather, traditions, people and places throughout Orkney.

You can visit the working Studio and Gallery, book a taster session or join in a workshop with Liz. You can browse workshop dates and times and book a place at [www.orkneyglasshut.co.uk/book-online](http://www.orkneyglasshut.co.uk/book-online).

Many participants come to the Workshops stating that they're not artistic; many leave following Liz's personal and professional guidance and encouragement stunned at how artistic they can be. Come and try fused glass for yourself at a leisurely afternoon or evening with the Orkney Glass Hut fused glass experience.

We are open mid-week for visits and viewing but if you wish please contact us to arrange a visit outside of our normal opening times.

Marion's jewellery reflects the stories and natural beauty of Orkney and she uses the coastline as an endless source of inspiration

Her flagship designs are her Wave Rings which she started making as a student in the 1990's. They incorporate her love for the sea and the ever-changing nature of patterns and texture left as storms and tides wash the Orkney shores.

Marion also works in enamel and has more recently learnt the ancient Japanese technique of Mitsuro Hikime which uses a blend of waxes to create models to be cast it creates beautifully tactile pieces.

Marion's latest collection Sea Ribbons is made using Mitsuro and the textures and shapes marry perfectly with her previous Wave and Sea Shell collections.
